DSS™

From Authorization to Anastamosis

Staffing, Recovery, and Logistics for Organ Donation and Transplant

Dedicated Staffing Solutions helps organ procurement organizations and transplant centers maintain continuity with experienced onsite and remote teams. We provide rapid-response, supplemental, and ongoing coverage tailored to your practice.

Hospital Development Services
Build hospital partnerships and strengthen donation practices through education, referral improvement and ongoing program support.

Call Center
Referral intake and screening, documentation, hospital follow-up, donation authorization, donor risk interviews and coordinator dispatch.

Family Support Services
Specialists guide families through donation conversations, education, authorization and donor risk interviews, with attention to each family's needs.

Clinical Services
Onsite and remote coordinators support donor evaluation, clinical donor management, administrator-on-call coverage and organ allocation.

Surgical Services
Organ procurement by experienced recovery teams, cold storage and preservation, perfusion device operation, and abdominal and thoracoabdominal NRP.

Tissue Recovery Services
Experienced technicians recover muskuloskeletal, skin, nerve and cardiovascular grafts.

Logistics
24/7 air and ground coordination for organs, surgical recovery teams, transplant personnel, box runs and preservation or perfusion equipment

Transplant Center Services
Full-service or targeted support for waitlist management, organ offer triage and screening, transplant case coordination and delisting.

Let's talk about the coverage you need.
