Partnerships

We are a true one-stop-shop providing for the entire spectrum of specialized staffing and support service needs encountered by OPO's and Transplant Centers as well as procurement groups and other third-party providers.

The DSS team represents hundreds of years of donation and transplant experience with clinicians coming from OPO and Transplant Center backgrounds alike. Careers in the service of others; as a company we take that to heart.

We thrive on building long term relationships that become true partnerships by providing extensive real world experience with transparency and accountability.
